

FC TOPDARK NEW

for printers OKI C711WT, C920WT, PRO8432WT

SHOCKLINE

about your transfer paper

FC TOPDARKNEW is a **self-weeding, user friendly transfer paper** which **releases only toner**. It contains a white covering background layer which **boosts the colors**. **Very stretchable, soft and with bright colors**.

DESCRIPTION:

Self-weeding transfer paper for colored fabrics

TECHNICAL DATA:

FC TOPDARKNEW is made of 1 sheet of **FC TOPIIMAGE2** + 1 sheet of **FO TOPGLUEW4**.

FC TOPIIMAGE2 is made of a 75 g/m², 80 µm release paper liner and a 5 g/m², 5 µm laser printable layer. **FO TOPGLUEW4** is made of a 105 g/m², 120 µm hot release liner and a 65 g/m², 55 µm **layer of adhesive pigmented polymer**.

EQUIPMENT:

White Toner Printers OKI C711WT, C920WT, PRO8432WT + heat press
Must set to White ON.

APPLICATIONS:

Colored cotton and other colored natural and synthetic fabrics. Ideal for t-shirts, jeans, shoppers bags and other fabric objects.

INSTRUCTIONS:

1

Insert **FC TOPIIMAGE2 (letter or legal)** from the printer's by-pass and set to extra heavy paper 1 printing mode (121-188 gr/m²). **How to recognize the printing side:** *The clipped corner of the sheet must always be on the bottom right side in both letter and legal sheets. Print in mirror mode.*

MATCHING

Place the new **MA POLTEX** pad at the centre of the plate with the blue and white side facing upwards and a sheet of anti-adhesive tissue paper and heat for at least **120 seconds at 140°C/285°F**.

This step only before the first matching!

Place the following over the white portion of the **MA POLTEX** pad:

- FC TOPIIMAGE2** with the printed side upwards
- the small paper tag (contained in the box) in the bottom right corner.
This helps to remove the **FO TOPGLUEW4**.
- FO TOPGLUEW4** (which is slightly smaller than **FC TOPIIMAGE2**) with the glue side (bright white) on the print
- a sheet of adhesive-proof tissue paper

Then press **FO TOPGLUEW4** on **FC TOPIIMAGE2**.

Manual or air press: **140°C/285°F for 70-90 seconds** - 4 atm/med-high pressure

2

3

Use the small paper tag to immediately separate (while hot) **FO TOPGLUEW4** from **FC TOPIIMAGE2** by holding both tissue paper and glue sheet (do not let go of the tissue paper).

New! This step is now much easier because the **FC TOPIIMAGE2** will remain firmly stuck to the pad underneath.

4

Remove **MA POLTEX** and place the t-shirt or fabric on the press (heat for a couple of seconds) and then **FC TOPIIMAGE2 (after having trimmed the edges)** with the glue side on the fabric.

5

APPLICATION:

Manual or air press:
140°C/ 285°F for 22-25 seconds - 4 atm/med-high pressure

6

Remove FC TOPIIMAGE2 when completely cold with a smooth movement.
Press again with adhesive-proof tissue paper for 5-10 seconds **for greater washing resistance**.

Wash the garment inside-out at 40°C/104°F . Do not bleach. Tumble dry at low temperature. Do not iron directly on print.
For further information contact your dealer.

Store in a cool dry place. Do not expose to direct sunlight. If properly stored the product will maintain its features for at least 2 years.

The instructions on this sheet are merely indicative and contain details concerning tests carried out in our laboratories with our equipment.

It is essential to prepare the file according to the specifications of the White Toner printer. Do your own testing.

The manufacturer will replace defective material but is not responsible for any damage resulting from incorrect use.

*Available in packets containing 10 or 50 letter, or legal size **FC TOPIIMAGE2** sheets + 10 or 50 letter, or legal size **FO TOPGLUEW4** sheets.
Every box contains a **MA POLTEX** pad, paper tags and adhesive-proof tissue paper.
