ENVICTA® Cut
HEAT TRANSFER VINYL
 Personalize all types of
 Shirts, Athletic Sports-
 wear, Hoodies, & MORE!

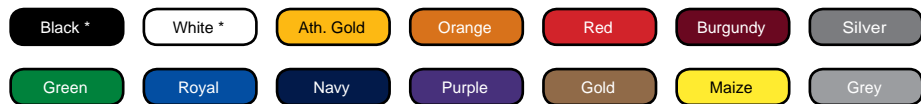

**ENVICTA® Cut is the
 Leader in
 Economy Heat Transfer
 Films Today!**

About ENVICTA® Cut:

BEST low cost solution, with a high value look and performance.
 Simple to cut, weeds incredibly fast, apply at 305°F in 8-10 seconds.
 Great for low or high volume production business.
 Flexible, durable, multi-layer numbers, letters, and logos.
 Block out most fabric dye-migration issues with an ideal **130-micron** thickness.
 Soft Matte finish. Non-pressure sensitive clear carrier.
 Easy position and relocate. (Stack transfers without sticking.)
 Washed and dried 100+ times, remains flexible with a soft hand.
 Recommended fabrics: Cottons, 50/50, Polyesters, Acrylic, Lycra and more.

Results **FLEX-ALL**

® **EVERY FABRIC AND
SUPER-STRETCH...**

*Results® Flex-ALL® is the
Strongest option available
for virtually ALL fabrics in
the market today!*

About Results® FLEX-ALL®

The Ultimate HTV color film for performance sportswear and high fashion decoration that's suitable for all fabrics, including Nylon/Spandex. Nothing really compares to the flexibility, durability, and comfort FLEX-ALL® has to offer. Results® FLEX-ALL® incorporates a proprietary Quick-Melt low temperature adhesive. Cut with a vinyl plotter or even laser cut then heat apply from 240°F - 300°F. Lower application temp leads to unlimited opportunities for all heat sensitive fabrics. 75 microns thin with a soft hand. White and Black films have a low tack pressure sensitive adhesive for hot or cold peel application. Colors are cold peel. Wash and dry 100+ times with guaranteed life-time, stretch and rebound, and FLEX-ALL® keeps an ultra-soft hand. Note: Not suitable for 100% nylon.

About Results® KWIK-ADH®:

Take fabric decoration to the limit with KWIK-ADH® and Results® Impact Textile Foil!

Our NEW KWIK-ADH® heat transfer foil adhesive gives you the edge over all other adhesives. Letters, logos, numbers are simply cut in reverse and then easily weed away what you do not need. You will be amazed at how KWIK-ADH® is so exceptionally easy to weed. You could do it with your eyes closed. KWIK-ADH® is only **45-microns** thin, designed to be as light as possible and give as much stretch and rebound as capable with foils. Place **FLAT** on top KWIK-ADH®, our Results® iMPACT Textile Foil or crunch it for a distressed look. The opportunities are really endless with Results® KWIK-ADH® and iMPACT Textile Foils. Results® iMPACT Textile Foils have 28 stocking awesome colors and patterns.

More foils available special order.

KWIK-ADH® Product Advantages

- Easy to design and so Easy to cut
- Weeding is the easiest in the market
- Thickness is 45 Microns flexible
- Wash ability: 50+ Cold wash and dry cycles
- Keeps a soft stretchable hand on the fabric.
- 12, 20, & 40 inches wide are available.
- Fabrics: Cotton, polyesters, cotton/poly blends.

Instructions

1. Design job and cut KWIK-ADH® in reverse.
2. Weed away excess material.
3. Pre-heat 2 seconds to flatten fabric.
4. Lay adhesive side flat on heat press, use cover sheet.
5. Tack apply at 300°F for 5 seconds
6. Peel Warm/Hot to expose adhesive.
7. Lay the foil shiny/color side up. Flat for 100% edge to edge coverage.
8. OPTIONAL STEP - Crunch for a distressed look.
9. Heat apply firm pressure with cover sheet 300°F for 15-20 seconds
10. Peel away when cooled. (COLD PEEL ONLY)

Note: Turn it up!. From a distressed look. Come back with another foil color and lay it flat to fill in the open areas that only show the adhesive.
Just follow step 9 and 10 again.

Astounding Quality Digitally
Printable Film that has
Unmatched Value!

About Results® PLATINUM PRINT OPAQUE®

Platinum PRINT OPAQUE includes the innovative **NEW** Thermo-Bonding adhesive for durability and comfort. Developed to perfectly personalize virtually any fabric, especially polyesters, cottons, blends, and Lycra®/Spandex. Design and print high resolution photo-quality detail on the brightest white film in the industry. A **70-micron** PU film with a proprietary quick ink dry top coat that maintains 100% color fastness after 50 hot or cold-water wash and dry cycles. We guarantee the easiest film to cut and weed small to large images. Pair Platinum Print with our dedicated MASK, that has a gradual, easy pull away from the film liner, for the easiest release in the market today.

Yes, we thought of almost everything with this film!!!

Heat apply in 7-10 seconds at 300°F down to a mere 275°F to minimize dye-migration and eliminate damage to heat sensitive fabrics.

Instructions

1. Print, Cut, and then easily weed the excess film surrounding graphic.
2. Allow ink to gas out for 30-40 minutes.
3. Apply Results Mask over remaining image
4. Preheat garment 2 seconds
5. Peel back printed transfer from film liner & place on garment
6. Heat Press Time: Pressure is Medium.
7. Use Cover Sheet: 7 sec. peel warm and heat again for 7 seconds.
8. Heat Press Temp: 300°F down to 275°F to minimize dye-migration.
9. Peel: Hot to Cool

Results® Platinum Print HTV BLOCK®

A NEW, Industry technological break-out film!

A REVOLUTION IS HERE FOR THE FIGHT AGAINST DYE MIGRATION!

Product Advantage

- Low gloss matte finish.
- Print full colored photo-quality graphics, logos & corporate images.
- NEW carbon-charcoal liner Now with
- Personalize virtually any fabric, even performance polyesters and cottons.
- Extremely flexible, soft hand, fabric blending.
- Durable, with color fastness 100%.
- Heat Application 240°F - 275°F.
- Required mask: Results® JMASK.

Product Specifications

- Thickness: comfortable 95 microns (.095)
- Composition: High grade Polyurethane (PU)
- Carrier: Clear, Non-Pressure sensitive, ez2weed.
- Ink Gas Out Time: 30 minutes
- Wash and Dry Cycles: 200
- Inks: Latex, UV, and most Eco solvent inks.

Helpful tip: Use Platinum Print HTV BLOCK® to cover over mistakes from other films.

Perfect for printing light colored numbers and letters.

Instructions

1. Print, Cut, then easily, weed the excess film from the surrounding graphic.
2. Allow ink to gas out for 30 minutes. Apply Results® JMASK over image.
3. Preheat fabric 2 seconds.
4. Peel back printed transfer from film liner & place on fabric.
5. Heat Press pressure 60psi to medium.
6. Heat Press Time: 8-10 seconds.
7. Heat Press Temp: 240°F-275°F.
8. Peel: Warm to Cool. Enjoy!

GO EVEN FARTHER!
Results® Platinum Print PLUS
 Exceed decoration boundaries
 on any and every fabric. Team
 sports, corporate logos, or a
 photo-quality image on any
 garment or promotional product.

About Results® PLATINUM PRINT PLUS

Results® Platinum Print PLUS is the ultimate printable semi-matte digital film for dark and light colored fabric decoration. The highly flexible **75-micron** PU print film has been developed to personalize virtually any fabric, especially Nylons, Polyesters, Lycra®, cottons, leathers, rayon and more.

Yes it applies on just about anything, just try it!

- Accepts Eco Solvent, Solvent, hp latex and UV ink.
- Guaranteed life time stretch and rebound
- Ultra-soft hand feel. All weather.
- Durable, light weight, extremely flexible
- 75 microns. Will not crack, or peel.
- Proprietary secret adhesive.
- Heat Press from 240°F. Film and fabric feel like one.
- Wash and dry, and wear 100+ times.
- Dry clean suitable with UV Inks.
- Recommended mask. Results® J MASK

About Results® Allura Print/Cut HTV Film.

Print or cut, while keeping a silver twinkle back ground on a white base. Print photo-quality images, team sports and corporate logos. Colors burst out from the embedded silver particles in the film face. Especially with a full ink coverage over the film. ALLURA IS OUT OF THIS WORLD! Suitable for all fabrics, easy to work with, and perfect for a dye sublimation look. Allura is durable, extremely flexible, and elegantly attractive. Decorate shoes, shirts, nylon products, cottons, and moisture wicking polyesters and promotional items

Just 65 microns thin, has a soft safe polyurethane composition and a proprietary all fabric adhesive. When heat pressed into the fabric, they become one. Allura keeps a soft hand, even after 100 wash and dry cycles. Perfect for sensitive fabrics, heat application starts at 250°F. Production friendly, easy to weed and has a warm peel.

Suitable for digital printers working with Eco Solvent, Solvent, UV and HP latex inks. Recommended mask: Results® JMASK.

- Thickness 65 Microns.
- Heat Application: 250°F - 275°F. Just 8 seconds.
- Peel Warm or Hot.
- Roll Size: 20" x 25yds

GET THE BEST FILM BUILT FOR LIGHT COLOR SHIRTS!
Results® Platinum PRINT CLEAR
Digital Heat Transfer Film.
The Ultimate See-Thru Matte Film with Unmatched Value!

About Results® PLATINUM PRINT CLEAR

The ultimate printable see-through matte film for light colored garment decoration. Developed to perfectly personalize virtually any fabric. Print vibrant color custom graphics with photographic quality. Print in reverse, trim and transfer in 8-12 seconds. Ultra soft hand, emulates screen printing without the fading, cracking or peeling from any fabric. Durable at **55 Microns**, superior abrasive, water-proof, stain resistant.

Wash, dry, and wear 100+ times. Dry clean suitable.
 Guaranteed life time stretch and rebound, PLATINUM PRINT CLEAR is an all-weather champion.

Recommended fabrics:

Cotton, Polyester, 50/50, Lycra, Spandex. and more.

Instructions

1. Print&Cut in REVERSE then weed the excess film surrounding graphic
2. Preheat garment 4 seconds
3. Place Printed Graphic on garment
4. Heat Press Time: 8-10 seconds - Medium Pressure
5. Heat Press Temperature: 300°F
6. Peel: Warm to Cool.

CUTTING NOTES

Always test cut prior to any production run. For optimal cutting and weeding, maintain a line thickness of at least 1/16" for lettering & logos.

CARE INSTRUCTIONS

Machine wash inside out using mild detergent. Do not use bleach. Dry at a normal dryer setting on household machines. Do not dry clean.

STORAGE

Store in a cool and dry area around 65 to 70° F with 50% relative humidity. Keep away from direct heat, sunlight and humidity. Recommended shelf life is one year.
